

HARIOM PIPE INDUSTRIES LIMITED

Environment Policy

Commitment

Hariom Pipe Industries Limited (HPIL) has consistently demonstrated a dedication to safeguarding the environment and mitigating our influence on it. For us, environmental preservation extends beyond mere regulatory requirements; it serves as a guiding principle for our business operations. We hold ourselves to elevated benchmarks of ethics, integrity, and sustainability to align with our environmental objectives and the principles of ethical and equitable business conduct. This is achieved by integrating a range of environmental factors, including GHG emissions, energy management, and the environmental impact of our products and services.

This document entails Hariom Pipe Industries Limited approach towards Environmental aspects and acts as a guideline to manage the related impact. This Policy will help us develop better environmental practices while conducting business and create value for relevant stakeholders.

Objectives of the policy

This policy conveys Hariom Pipe Industries Limited approach to integrate environmental aspects in our business processes, as well as identify and manage environment impacts and aspects. The aim of this policy is to:

- Strengthen Hariom Pipe Industries Limited environment program by setting up a robust governance mechanism to manage its impact on the environment.
- Engage with all relevant stakeholders to identify, categorize and manage our impact on them and their expectations from us on a regular basis.
- Act ethically and transparently in compliance with fulfilling all applicable statutory laws and regulations.

Scope and Applicability

This policy is applicable to all of Hariom Pipe Industries Limited business operations, facilities, offices, units in which the businesses have an operational and/or financial control.

Policy Statements

HPIL's environmental policy serves as a blueprint for managing its environmental footprint and fostering ongoing advancements in environmental performance. The company is dedicated to the continual enhancement of its environmental management system and the elevation of its overall performance, driven by a commitment to the following principles:

Environmental

- Identify environmental issues, assess their impact on our business, and set goals, targets, priorities, and action plan to mitigate the impact.

- Align systems to applicable local guidelines to measure and monitor our environmental performance.
- Ensure that HPIL contributes to the circular economy through judicious use of natural resources, reusing and recycling materials wherever appropriate, regulating the treatment and disposal of waste, and reducing and preventing pollution wherever possible.
- Measure and monitor various environmental parameters while ensuring alignment to our environment goals and targets.
- Promote, advocate, and effectively communicate environmental awareness/ practices at all levels in the organization, and among third party dealers and various other stakeholders.

Compliance

- Fulfill all applicable legal requirements, its compliance obligations, and other requirements.
- Ensure the accessibility of information and of essential resources, by regular monitoring and reviewing the performance against the set Environment objectives, and targets.

We shall continually improve the suitability, adequacy, and effectiveness of the environmental management system to:

- Enhance environmental performance.
- Cultivate a culture that fosters the adoption of an environmental management system.
- Communicate the relevant results of continual improvement to employees, and, where they exist, employee's representatives.
